

Information about Family Planning Services

We cover family planning services. Members do not need a referral from their Primary Care Provider for family planning services. Family planning services include:

- ❖ Pregnancy testing
- ❖ Testing and treatment of sexually transmitted diseases
- ❖ Birth control supplies including oral contraceptives (up to a 12-month supply)
- ❖ Family planning and education

Members can see any Medical Assistance provider at no cost. This includes out-of-network providers that offer family planning services.

When seeing a family planning provider that is not in the Highmark Wholecare network, show your Highmark Wholecare and ACCESS or EBT cards.

For more information on family planning services, or to get help finding a family planning provider, call Highmark Wholecare Member Services.
