Tobacco, Alcohol or Drug Use Assessment

Recommended Coding per Pennsylvania EPSDT Periodicity Schedule: 96160

Based on the Bright Futures Periodicity Schedule it is recommended that Adolescents be assessed for use of Tobacco, Alcohol or Drug use beginning at the age of 11 years old. These structured screenings require the use of validated screening tools to assess for clinical indication that the child may need further clinical evaluation.

Highmark Wholecare plans do not endorse or require any specific screening tool for screening purposes. This list is not all-inclusive, and other validated screening tools may be available. Each practice is encouraged to utilize a screening tool that is best suited for their individual situation.

Validated Screening Tool	Age for Use	Description	Administration Time Scoring information (if available)	Where to find additional information / purchase
Tobacco, Alcohol or Drug Use Assessment –11 through 20 years				
Car, Relax, Alone, Forget, Friends, Trouble (CRAFT2.1+N) English / Spanish / Vietnamese / German / Haitian Creole / Japanese / Khmer / Mandarin Chinese / Portuguese / Turkish	12 years to 21 years	The CRAFT is an efficient and effective health screening tool designed to identify substance use, substance-related riding/driving risk, and substance use disorder among youth ages 12-21. It has been implemented as part of universal screening efforts in thousands of busy medical and community health settings, as it yields information that can serve as the basis for early intervention and patient-centered counseling. The CRAFT 2.1 Screening Interview is intended for use by trained clinicians as a brief interview with an adolescent patient. The CRAFT 2.1+N contains an additional question about tobacco and nicotine use. Self-Administered version also available	5 to 10 minutes	http://craftt.org/ Cost: The Suggested Tax-Deductible Donation is \$1.00/card or \$20.00/25 cards, plus \$2.50 for shipping and handling.

Brief Screener for Alcohol, Tobacco, and other Drugs (BSTAD)	12 to 17 years	The BSTAD ask patients about frequency of past year use and triage them into one of three levels of substance use disorder risk: no reported use, lower risk and higher risk. Can be administered by the provider or self-administered.	2 Minutes	https://www.drugabuse.gov/nidamed-medical-health-professionals/screening-tools-resources/screening-tools-for-adolescent-substance-use Cost: Free
Screening to Brief Intervention (S2BI)	12 to 17 years	The S2BI ask patients about frequency of past year use and triage them into one of three levels of substance use disorder risk: no reported use, lower risk and higher risk. Can be administered by the provider or self-administered.	2 Minutes	https://www.drugabuse.gov/nidamed-medical-health-professionals/screening-tools-resources/screening-tools-for-adolescent-substance-use Cost: Free
