## Glitch Resolved: Medicare Advantage Medical Policies N-35 and N-38

There was a technical glitch in the last publication of Medicare Advantage Medical Policy N-38: Partial Thromboplastin Time - NCD 190.16 and N-35: Gamma Glutamyl Transferase - NCD 190.32 that caused the diagnosis codes not to appear in either policy. The glitch has been resolved and providers can now view the policy on the Provider Resource Center:

- Hover over **Medical Policy Search** in the Quick Access Bar at the top of the website
- Select **MEDICARE CARE ADVANTAGE MEDICAL POLICIES**
- Type **N-35** or **N-38** into the **Search Bar**

**IMPORTANT REMINDER:** The Medicare Advantage Medical Policy Search will no longer be available on **February 13, 2023**. For more information on this change, click [here](#).
